

Technology is transforming health care through robust broadband connections

- ▶▶ Allows rural health care providers to treat patients locally by enabling access to specialists, quickly exchanging large medical images and electronic health records, and training health care personnel via video conference
- ▶▶ Lowers health care costs through reduced patient transfers and access to specialists
- ▶▶ Provides the necessary speed & reliability for disaster response, immunizations, and communicable disease reporting

The NCTN Dedicated Network Advantage

High reliability and guaranteed throughput

Versus typical internet service provider

NC TELEHEALTH NETWORK

Service Offerings

What We Do

Substantial Savings

The NCTN provides permanent 65% discounts for eligible providers through the FCC's new Healthcare Connect Fund program:

- Typical savings at a clinic site with 10 Mbps service is thousands of dollars each year
- Typical savings for a large hospital with a high-speed service of 1 Gbps is tens of thousands of dollars each year

Fast, Secure & Reliable Service

- Allows communications between NCTN sites without sending data over the public internet
- Supports critical access and first responder sites
- Enables high-demand applications such as video, telehealth, remote EHR, medical images, HIE, and more.

Are You Eligible?

Both public and non-profit health care sites are eligible for the FCC program discounts. Also, there are options for savings for in-eligible sites.

Free, No obligation Quotes

Our Success Stories

The NCTN has been in continuous operation since 2010 to an initial group of about 120 public and non-profit health care providers. These include public health sites, non-profit hospitals, FQHCs, free clinics, rural health clinics, mental health clinics and associated data centers.

Our initial subscribers received a combined \$12.1M through the FCC's Rural Healthcare Pilot Program.

The NCTN is the recipient of the 2011 Public Leadership Award from the NC Technology Association.

NCTN Benefits

- Lowers administrative costs
- Reduces time associated with complex regulatory compliance
- Facilitates the sharing of medical, administrative, and technical expertise
- Provides technical support and works closely with other service providers

Who We Are

The NC Telehealth Network (NCTN) provides high-speed, reliable, and cost-efficient broadband services with large discounts to eligible public and non-profit health care providers in North Carolina through a 2013 Federal Communications Commission (FCC) Program called the Healthcare Connect Fund.

Statewide Connectivity

The NCTN was built through the successful teamwork of key partners:

- The NCIPH, NCALHD, NCHA, NC Division of Public Health, Golden LEAF Foundation, NCAPHA, and NCCHCA
- The Cabarrus Health Alliance is the program coordinator
- MCNC, in collaboration with the NC Office of Information Technology and other private carriers, is the broadband service provider
